

# Hybrid Exchange Management with MigrationWiz

Easily configure and manage migrations in a hybrid Exchange environment with our proven cloud migration solution.

Many organizations turn to hybrid deployments for security and compliance reasons, specific application needs tied to an Exchange server, or as an intermediate step to a full Exchange Online deployment. But today's process of managing these migrations via PowerShell scripts and manual tasks in the Exchange Admin Center is restrictive. Here's how MigrationWiz can help.

## Improve Batch Management

Automatically import and manage multiple migration batches through a single, unified console. Easily move users between batches and customize other project settings before sync and cutover.

## Reduce Project Resources

A dedicated, lower-tier IT resource can manage migration batches 2-3 hours a week instead of today's typical hybrid deployment requiring full-time, on-site engagement from tier-3 personnel.

## Ease Transition

Provide a better hand-off of the hybrid environment from the partner or consultant to the end-user organization for long-term management and coexistence.

## Key Benefits

### EASY TO CONFIGURE AND USE

No specialized training or certifications necessary, and no hardware or software to install and maintain. MigrationWiz just works!

### SECURE AND COMPLIANT

Collaborate on projects without sharing passwords or providing RDP access. Track project steps via user action logging for audit best practices.

### FAST AND EFFICIENT

We leverage existing hybrid Exchange architecture for faster migration speeds and time to value while reducing project costs.

### ENTERPRISE RELIABILITY

Whether it's 500 users or 50,000, MigrationWiz has a proven track record of supporting migration projects at any scale.

BitTitan® empowers IT service professionals to successfully deploy and manage cloud technologies through automation. MigrationWiz™ is the industry-leading SaaS solution for mailbox, document and public folder migrations between a wide range of Sources and Destinations. Since 2009, BitTitan has moved over 15 million users to the cloud for 40,000 customers in 187 countries and supports leading cloud ecosystems including Microsoft, Amazon, Google and Dropbox. The global company has offices in Seattle and Singapore. To learn more, visit [www.BitTitan.com](http://www.BitTitan.com).
